

SDC Capture™

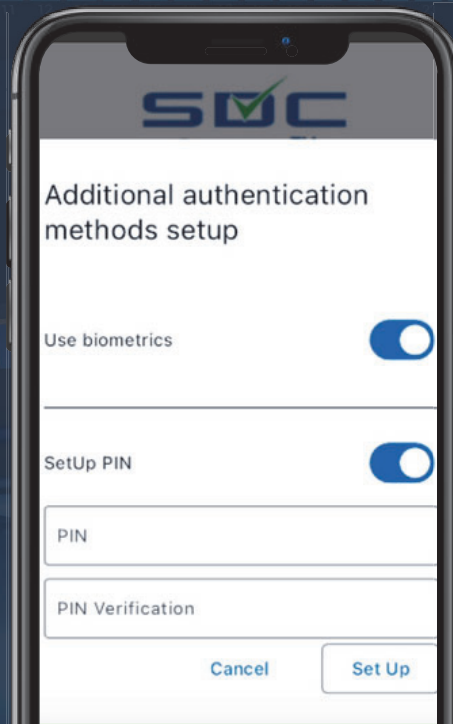

Technology Features:

- ✓ On-Device (PD) or Web Panel (BYOD) Subject Registration and Assignment
- ✓ Multiple Login Options and Security Controls
- ✓ Self-service Password/Pin Resets
- ✓ Simple End-User Customization for Dark/Light Mode, Font Size and Language
- ✓ Scheduled & Unscheduled Assessments for adhoc data capture
- ✓ Alerts to assist in data collection compliance

The ideal ePRO technology

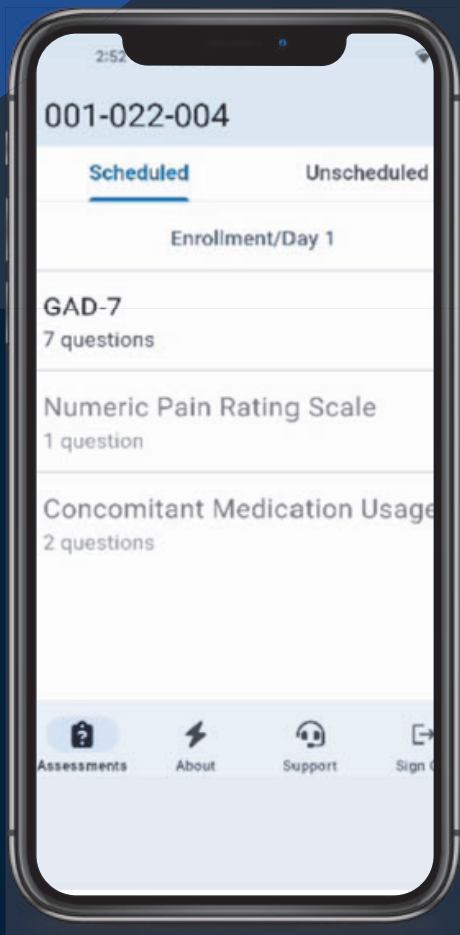

The best
technology to
enhance your
data collection.

- ✓ Ease of use for subjects and sites
- ✓ Data reliability
- ✓ Robust data security

SDC Capture™

Validated:

SDC Capture is 21 CFR Part 11 compliant and fully validated in alignment with the highest of industry standards.

Benefits:

Elimination of Paper

By fully digitizing data collection, the BYOD ePRO solution eliminates paper forms, reducing waste and errors while streamlining data management and accelerating processing.

Affordability

Utilizing participants' own devices eliminates the need for additional hardware, significantly reducing costs and simplifying logistics. This BYOD approach, coupled with our rapid and cost-effective development costs makes SDC Capture the most affordable and efficient ePRO solution available.

Enhanced Participant Adherence

Our intuitive platform seamlessly integrates into participants' daily lives, allowing them to use their personal devices for easy engagement and compliance with study protocols, enhancing adherence, data accuracy and reducing the patient burden.

Seamless Integration

Empower participants to use their own devices, ensuring smooth, hassle-free data collection with a user-friendly experience that integrates seamlessly into their daily routines.

Improved Data Quality

Real-time reminders, support and feedback through personal devices leads to higher quality data and more reliable trial outcomes, benefiting both researchers and participants.
